

1.5 Requirements for Further Technical Information

The Lungmen Nuclear Power Station (NPS) is based on the GE ABWR described in the ABWR Standard Safety Analysis Report (SSAR). This design has been extensively reviewed by the USNRC and has been granted a design certification under the requirements of Title 10 of the Code of Federal Regulations Part 52 (10 CFR 52). The US NRC review is documented in a Final Safety Evaluation Report (FSER) NUREG-1503 dated July 1994. There are no requirements for additional technical information contained in the ABWR SSAR or the US NRC FSER.
