

**Chapter 3
List of Tables**

Table 3.2-1a Classification Summary - List of Systems3.2-9

Table 3.2-1b Classification Summary - Nuclear Island.....3.2-16

Table 3.2-1c Classification Summary Ñ Balance of Plant3.2-53

Table 3.2-1d Classification Summary - Notes and Footnotes3.2-67

Table 3.2-2 Minimum Design Requirements for an Assigned Safety Designation.....3.2-74

Table 3.2-3 Quality Group DesignationsÑCodes and Industry Standards3.2-75

Table 3.4-1 Structures, Penetrations, and Access Openings Designed for Flood Protection
(note 6).....3.4-8

Table 3.5-1 Requirement for the Probability of Missile Generation for Lungmen NPS3.5-14

Table 3.6-1 Essential Systems, Components, and Equipment for Postulated Pipe Failures
Inside Containment.....3.6-30

Table 3.6-2 Essential Systems, Components, and Equipment for Postulated Pipe Failures
Outside Containment3.6-31

Table 3.6-3 High-Energy Piping Inside Containment3.6-32

Table 3.6-4 High-Energy Piping Outside Containment.....3.6-32

Table 3.6-5 Moderate-Energy Piping Inside Containment3.6-33

Table 3.6-6 Moderate-Energy Piping Outside Containment3.6-33

Table 3.6-7 Additional Criteria for Integrated Leakage Rate Test3.6-34

Table 3.7-1 Damping for Different Materials.....3.7-42

Table 3.8-1 Load Combinations, Load Factors and Acceptance Criteria for the Reinforced
Concrete Containment (1), (2), (3), (4), (5), (6)3.8-51

Table 3.8-2 Major Allowable Stresses in Concrete and Reinforcing Steel3.8-52

Table 3.8-3 Stress Intensity Limits3.8-52

Table 3.8-4 Codes, Standards, Specifications, and Regulations Used in the Design and
Construction of Seismic Category I Internal Structures of the Containment.....3.8-53

Table 3.8-5 Load Combinations, Load Factors and Acceptance Criteria for Reinforced
Concrete Structures Inside the Containment (1), (2), (3), (4), (5), (6), (7).....3.8-55

Table 3.8-6 Load Combinations, Load Factors and Acceptance Criteria for Steel Structures Inside
the Containment (1), (2), (3), (4), (5), (6), (7)3.8-56

List of Tables (Continued)

Table 3.8-7	Load Combinations for Foundation Design	3.8-57
Table 3.8-8	Welding Activities and Weld Examination Requirements for Containment Vessel (1)(2)(3)	3.8-58
Table 3.8-9	Exceptions to Standard ANSI/AISC N690 Nuclear Facilities-Steel Safety-Related Structures	3.8-59
Table 3.8-10	Exceptions to ACI 349, Appendix B on Steel Embedments	3.8-60
Table 3.9-1	Plant Events	3.9-78
Table 3.9-2	Load Combinations and Acceptance Criteria for Safety-Related, ASME Code Class 1, 2 and 3 Components, Component Supports, and Class CS Structures	3.9-80
Table 3.9-3	Pressure Differentials Across Reactor Vessel Internals	3.9-83
Table 3.9-4	Deformation Limit for Safety Class Reactor Internal Structures Only	3.9-84
Table 3.9-5	Primary Stress Limit for Safety Class Reactor Internal Structures Only	3.9-85
Table 3.9-6	Buckling Stability Limit for Safety Class Reactor Internal Structures Only	3.9-87
Table 3.9-7	Fatigue Limit for Safety Class Reactor Internal Structures Only.....	3.9-88
Table 3.9-8	Inservice Testing Safety-Related Pumps and Valves	3.9-89
Table 3.9-9	Reactor Coolant System Pressure Isolation Valves.....	3.9-122
Table 3.9-10	Welding Activities and Weld Examination Requirements for ASME Code, Section III Welds	3.9-123
Table 3B-1	Pool Swell Calculated Values	3B-30
Table 3B-2	Final ABWR HVT Test Matrix.....	3B-31
Table 3B-2	Final ABWR HVT Test Matrix (Continued).....	3B-32
Table 3B-3	Mean and Standard Deviation of CH POP and PRMS by Test.....	3B-33
Table 3B-4	Average Chug Period by 10-second Segment for Steam Breaks at 21°C	3B-33
Table 3B-5	Average Chug Period by 10-Second Segment for Steam Breaks at 49°C	3B-34
Table 3B-6	Average Chug Period by 10-Second Segment for Steam Breaks at 68°C	3B-34
Table 3B-7	Average Chug Period by 10-Second Segment for Steam Breaks at 21°C, 49°C, and 68°C	3B-35
Table 3B-8	Pool Swell Model Comparison with PSTF Test Data	3B-35

List of Tables (Continued)

Table 3B-9	Model vs PSTF Test Data Comparison Results Summary at Selected Time	3B-36
Table 3I-1	Plant Environment Location and Condition Cross Reference of Table Numbers	3I-5
Table 3I-2	Thermodynamic Environment Conditions Inside Primary Containment Vessel Plant Normal Operating Conditions1	3I-5
Table 3I-3	Thermodynamic Environment Conditions Inside Reactor Building (Secondary Containment) Plant Normal Operating Conditions	3I-6
Table 3I-4	Thermodynamic Environment Conditions Inside Reactor Building (Outside Secondary Containment) Plant Normal Operating Conditions	3I-7
Table 3I-5	Thermodynamic Environment Conditions Inside Control Building Plant Normal Operating Conditions	3I-7
Table 3I-6	Thermodynamic Environment Conditions Inside Turbine Building Plant Normal Operating Conditions	3I-8
Table 3I-7	Radiation Environment Conditions Inside Primary Containment Vessel Plant Normal Operating Conditions	3I-8
Table 3I-8	Radiation Environment Conditions Inside Reactor Building (Secondary Containment) Plant Normal Operating Conditions	3I-9
Table 3I-9	Radiation Environment Conditions Inside Reactor Building (Outside Secondary Containment) Plant Normal Operating Conditions	3I-10
Table 3I-10	Radiation Environment Conditions Inside Control Building Plant Normal Operating Conditions	3I-10
Table 3I-11	Radiation Environment Conditions Inside Turbine Building Plant Normal Operating Conditions	3I-11
Table 3I-12	Thermodynamic Environment Conditions Inside Primary Containment Vessel Plant Accident Conditions	3I-11
Table 3I-13	Thermodynamic Environment Conditions Inside Reactor Building (Secondary Containment) Plant Accident Conditions	3I-12
Table 3I-14	Thermodynamic Environment Conditions Inside Reactor Building (Outside Secondary Containment) Plant Accident Conditions	3I-15
Table 3I-15	Thermodynamic Environment Conditions Inside Control Building Plant Accident Conditions	3I-15
Table 3I-16	Radiation Environment Conditions Inside Primary Containment Design Basis Accident Conditions	3I-16

List of Tables (Continued)

Table 3I-17	Radiation Environment Conditions Inside Reactor Building Design Basis Accident (Secondary Containment)	3I-16
Table 3I-18	Radiation Environment Conditions Inside Reactor Building Design Basis Accident Conditions (Outside Secondary Containment)	3I-17
Table 3I-19	Radiation Environment Conditions Inside Control Building Design Basis Accident Conditions	3I-17
Table 3M-1	Low Pressure Sink Component Sizes	3M-7
